Dear Sir/Mme

I have known **Dr. Ayman Raafat** for more than ten years (2000- 2010), as he taught Multimedia courses at Misr International University. He proved to be the best who can develop courses of multimedia for Mass Communication students.

I also cooperated with him at Canadian International College- CIC, where I was head of IMC department at the school of Communication (2012-2016) and he used to teach “Introduction to Multimedia”. He perfectly taught “Advertising in Electronic Media”. As I was head of judging committee of his end of term projects, his students successfully produced radio, TV ads and created creative social media marketing plans.

As an instructor, he is a hard worker and successfully interacts with students, motivates them to learn and produce projects. As for his character, he has a balanced character, polite and sociable.

I strongly recommend him for broadcasting programs, as well as multimedia courses in your reputable university.

With my best wishes,

Dear Ayman Raafat Elgndy,

On behalf of the AUEIRC Organizing Committee, we are pleased to inform you that your submitted paper entitled “Useful methods for organizing media and projects in post-production workflows” has been reviewed by the scientific reviewers and Accepted with modification for publication in AUEIRC’20 proceedings publish by Springer.

In your final revision of the paper, please incorporate the recommended suggestions from the reviewers in order to complete the publication process.

Kindly see the reviewer’s comments for your submission.

1. Having followed the conference paper template nicely, please try to complete the paper, as its valuable topic and theme deserve to be shared with the audience fully. For example, the “Research Methodology” is still only two lines, as are “The Results”.
2. While this is a nice overview, there needs to be much more specificity. Is the author advocating for a particular method of library creation? If so, what are its advantages in relation to other methods of library creation and curation? Is the author advocating for a particular add-on or product? If so, what are the advantages and disadvantages of this add-on over another? These are issues that need to be considered if we are being asked to evaluate different methods.

VERY IMPORTANT INFORMATION:

- Please follow the instructions and guidelines for your final version of the paper. <https://www.springer.com/gp/authors-editors/conference-proceedings/conference-proceedings-guidelines>.

Congratulation on the acceptance of your paper in AUEIRC’20.

We look forward to seeing you at the conference.

Sincerely,

Professor Marwan Al-Akaidi

To Whom it May Concern

June, 1st ,2018

Dear Sir/Mme

I have known **Dr. Ayman Raafat** for more than ten years (2000- 2010), as he taught Multimedia courses at Misr International University. He proved to be the best who can develop courses of multimedia for Mass Communication students.

I also cooperated with him at Canadian International College- CIC, where I was head of IMC department at the school of Communication (2012-2016) and he used to teach “Introduction to Multimedia”. He perfectly taught “Advertising in Electronic Media”. As I was head of judging committee of his end of term projects, his students successfully produced radio, TV ads and created creative social media marketing plans.

As an instructor, he is a hard worker and successfully interacts with students, motivates them to learn and produce projects. As for his character, he has a balanced character, polite and sociable.

I strongly recommend him for broadcasting programs, as well as multimedia courses in your reputable university.

With my best wishes,

Dr. Nagwa El Gazzar
